

Specifically designed for Family Practice,  
Internal Medicine, ENT and Allergy Practices...

ConcurMDEHR™

ConcurMDPM™

ConcurMDLIS™

Over the last 12 years, MedSym, Inc., a Birmingham, Alabama based healthcare technology company, has been providing a fully integrated modular practice management, electronic health record and laboratory information system. The ConcurMD Suite is utilized by leading healthcare organizations and physician practices throughout the United States. The ConcurMDEHR, ConcurMDPM and ConcurMDLIS solution suite is unique in that it has been designed for specialties such as Primary Care/Family Practice, Internal Medicine, Allergy/Ear, Nose and Throat, and Sports Medicine medical practices.

The ConcurMD Suite has been designed and developed by MedSym with a singular focus on patient care for these medical specialties, enabling many innovative clinical and revenue cycle management functionalities. The ConcurMD suite is peerless: correlated care processes and ordered business workflow — **your practice in perfect symmetry.**

Hundreds of satisfied physicians, administrators, nurses and billing personnel testify to the ease of use and quality of care that the ConcurMD suite delivers. Built-in fully populated templates specific to these specialties simplify encounters by reducing paperwork immediately. Chief complaint templates, as well as templates for HPI, ROS, PPH, Plan, etc. are available to speed documentation. Templates can also be quickly created and edited as required and retained for new patient encounters for whom that template would be appropriate.

### Easy to Use and Affordable Solutions

Technology should facilitate efficient patient care. We've built the ConcurMD application around this basic idea, creating an intuitive solution that enables physician practices to effective and rapid adoption of clinical and revenue cycle management information technology.

Acquiring the ConcurMD system doesn't require a large upfront investment in hardware or software fees – a fact that separates us from the competition. Everything a practice needs to streamline workflow and eliminate paper is available within the ConcurMD system.

Our experts at MedSym's Data Center install, host and maintain the solutions, performing backups and routine system maintenance. We install updates automatically – ensuring that practices have hassle-free access to the newest features and functions. We can also deploy resident on-site server solutions in conjunction with your IT group.

### Rapid Return on Investment

ConcurMD is pre-configured with specific Family Practice, Internal Medicine, ENT/Allergy and Sports Medicine based workflow features and functions designed to eliminate the inefficiencies of paper and to reduce printing, filing, storage and labor costs. Physician practices use our CCHIT-certified EHR to reduce transcription costs and to improve coding accuracy, saving tens of thousands of dollars each year. Integration with outside labs and HIS streamlines the patient care process. Our intuitive practice management solution does what MedSym's clients determined a medical practice application should do – simplifying scheduling, billing and posting processes to eliminate error and expedite payments.

# An integrated medical practice system — for your unique specialty

It would be our pleasure to provide a demonstration  
of the following ConcurMD system features:

## Integrated Electronic Health Records & PM System

- ✓ Fully integrated EHR, PM and LIS on one MS SQL database
- ✓ User-definable encounter structure with extensive documentation content
- ✓ Real-time electronic orders and results management
- ✓ Pre-configured specialty specific clinical and business workflow design

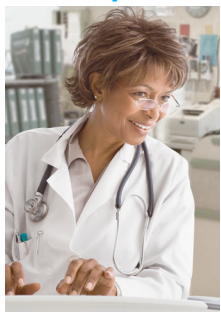

## Progress Note Functionality

- ✓ Document notes with customizable templates and handwriting recognition
- ✓ Supports dictation and transcription integration
- ✓ Automated E&M coding
- ✓ Easy attachment of scanned images to patient notes
- ✓ Electronic signature support

## Eligibility, Authorization & Contract Management

- ✓ Online real-time access to preauthorization and claim adjudication
- ✓ Online real-time claim adjudication with carrier supported EDI
- ✓ Automated receipt of eligibility requests
- ✓ Tracking of multiple managed-care contracts including fee schedules and co-pays

## Prescription Writer

- ✓ First DataBank drug allergy and contra-indication alerts
- ✓ e-Prescription writing support
- ✓ Historical patient drug utilization
- ✓ Fax prescriptions from patient records directly to the pharmacy

## Specialty Staging and Decision Support

- ✓ Preview planned orders, labs and vitals
- ✓ Vital Signs data capture

## Laboratory Data

- ✓ Lab data can be imported from outside or in-house lab using industry standard formats (HL7)
- ✓ Automatic and customizable abnormal data flags
- ✓ Decision support tools for lab results, vitals, allergy and medication alerts
- ✓ Supports interfaces with most labs, including LabCorp and Quest Diagnostics

## Messaging

- ✓ Intra-office messaging independent of MS Exchange
- ✓ Chart info can be faxed to consulting physicians

## Reporting

### ✓ Robust library of reporting tools:

- ✓ Transaction listing
- ✓ Incomplete Insurance report (user-defined patient/insurance aging categories by date range for itemized charges)
- ✓ Clinical recall report (selected by patient name, account number, birth date, provider, recall reason, last service date, or procedure selection)
- ✓ Demographics reports
- ✓ New patient listing
- ✓ Reports may be sorted/filtered by any combination of A/R class, department, insurance, provider, plus date range (daily, weekly, monthly, quarterly, annually, and for any date or date range)
